iPad Fix #2

1. After connecting to home wifi, go to Settings>General>Reset>Reset Network Settings.
2. After iPad resets, go to Settings>Safari>Clear Website Data.
3. Open Safari, type in a simple url, e.g. “www.abc.com,” tap “Go.”
4. You may get a small message asking to cancel or continue. Tap “continue.”
5. The iBoss login should now show. This login is the same for when students log into computers at the CSM. Username is last name, first initial, last three digits of student number: chambersj649
Password is capital “S,” lowercase “t,” and full student number: St1234649
6. Tap “Login” and now the iPad should connect to the Internet.
